

New Zealand Diploma in Architectural Technology (Level 6) OP2416

To help you manage your workload, we recommend you study courses in the order listed below. You should include CON101 Communication in the Construction Industry in your first block of study. Please note that some courses must be completed before enrolling in other courses (i.e. pre-requisites).

Compulsory Courses

(240 credits)

Complete all 15 compulsory courses in the order listed

1. CON101 Communication in the Construction Industry

Ensure CON101 is included in your first trimester.

2. CON102 Tendering Administration Processes for Construction Projects

Prerequisite for CON103

3. CON104 Materials in Construction Projects

You will need to have access to a New Zealand built construction.

4. DAT101 Concept Design

Learning and applying CAD software is recommended for this course.

5. CON105 Services for Construction Projects

6. CON106 Structures for Residential Construction Projects

7. DAT102 Preliminary Design

Learning and applying CAD software is necessary for this course.

8. CON103 Contract Administration for Valuing Building Works

9. CON108 Commercial Construction 1

Prerequisite for CON109

10. CON107 Feasibility and Analytical Reports for Construction Projects

You will need to have access to a New Zealand built construction.

11. DAT103 Developed Design

Learning and applying CAD software is necessary for this course.

12. CON109 Commercial Construction 2

13. DAT104 Detailed Design 1

(30 credit course – taught across 32 weeks)

Using CAD software is mandatory for this course

14. DAT106 Design Principles

15. DAT105 Detailed Design 2

Using CAD software is mandatory for this course.

Students would benefit from having completed CON108 & CON109 before enrolling in this course.
